Cost: Amount Spent on the PPC campaign. You are charged when a Click occurs on an ad.

Avg. CPC: The amount paid for your Ads divided by your total Clicks.

Note: Costs do not include management fee

"Calls from ads" refers to a qualified conversion, meaning that the call had to go through and last for at least 60 seconds for it to be counted.

"Calls Count" in the Call Reporting Details widget measures the total call volume generated by the ad.

Because a single ad can display multiple extensions at the same time, this data overlaps. As a result, the combined metrics (Impressions, Clicks, CTR, Cost, & Avg. CPC) for all extensions will appear much higher than the actual overall campaign totals.

This report shows many times an ad was clicked that contained that extension, not how many people clicked on that specific extension itself.

URL Click: When users click on the final URL in an ad.

Headline Click: Clicks on the ad's main headline, which also leads users to the main landing page.

Sitelink Click: When a user clicks on one of the sitelink extensions that links then directly to a specific page on your site.

Get Location Details Click: When a user clicks in to expand the client's location in the Maps section of the search results list.

Phone Calls Click: When a user clicks to call your business (includes hang ups after the click - will be less than the completed calls reported in the Conversion section).

Driving Directions Click: When a user clicks on the "Get Directions" link within an ad.

Location Expansion: Clicks on ads shown to users near or interested in locations similar to those targeted in the campaign.

"Calls Count" is the number of times people clicked on a phone number displayed in an ad on a mobile device or manually dialed the Google forwarding number displayed in an ad on any device, regardless of the duration.

"Calls from ads" in the PPC Other Google Conversions widget measures qualified calls that last at least 60 seconds.

Grid contains more rows, but they have been clipped.

Because a single ad can display multiple extensions at the same time, this data overlaps. As a result, the combined metrics (Impressions, Events, Event Rate, Client Ad Cost, & Client CPE) for all extensions will appear much higher than the actual overall campaign totals.

Performance Max Extension Type Performance

This report shows many times an ad was clicked that contained that extension, not how many people clicks on that specific extension itself. Location Extensions are not currently available to be shown.

"Phone Calls" is the number of times people clicked on a phone number displayed in an ad on a mobile device or manually dialed the Google forwarding number displayed in an ad on any device, regardless of the duration.

"Calls from ads" in the Performance Max Other Google Conversions widget measures qualified calls that last at least 60 seconds.

Chats: Number of people that started a chat

Leads: Number of Visitors that started a chat and converted into a lead

Billable Leads: Leads classified as Sales Leads

Chat vs. Lead Ratio: $(\text{Billable Leads} / \text{Chats}) \times 100$

Note: Data is updated once daily. Chats and Leads will update during the next day's sync.

What are the different Lead types?

Sales Lead: (Billable) Someone we've chatted with where we've obtained the visitor's name and contact information (phone number and/or email address), what the visitor is looking for is offered by the business, and the visitor falls within the businesses geographic coverage area. This lead type is billable.

Service Lead: (Non-Billable) An existing client of the business - they may be trying to reschedule an appointment or get in touch with their account manager, etc. This lead type is non-billable.

Other Lead: (Non-Billable) Someone who's outside of the geographic coverage area, someone looking for a service the business doesn't offer, looking for a job, etc. This lead type is non-billable.
