Instagram Performance

Cost: Amount Spent on the PPC campaign. You are charged when a Click occurs on an ad.

Avg. CPC: The amount paid for your Ads divided by your total Clicks.

Note: Costs do not include management fee

"Calls from ads" refers to a qualified conversion, meaning that the call had to go through and last for at least 60 seconds for it to be counted.

Because a single ad can display multiple extensions at the same time, this data overlaps. As a result, the combined metrics (Impressions, Clicks, CTR, Cost, & Avg. CPC) for all extensions will appear much higher than the actual overall campaign totals.

● Clickable element – drives traffic to destination URL ● Non-clickable – display / informational only ● Ad Extension – optional Google Ads enhancement

This report shows many times an ad was clicked that contained that extension, not how many people clicked on that specific extension itself.

URL Click: When users click on the final URL in an ad.

Headline Click: Clicks on the ad's main headline, which also leads users to the main landing page.

Sitelink Click: When a user clicks on one of the sitelink extensions that links then directly to a specific page on your site.

Get Location Details Click: When a user clicks in to expand the client's location in the Maps section of the search results list.

Phone Calls Click: When a user clicks to call your business (includes hang ups after the click - will be less than the completed calls reported in the Conversion section).

Driving Directions Click: When a user clicks on the "Get Directions" link within an ad.

Location Expansion: Clicks on ads shown to users near or interested in locations similar to those targeted in the campaign.

"Calls Count" is the number of times people clicked on a phone number displayed in an ad on a mobile device or manually dialed the Google forwarding number displayed in an ad on any device, regardless of the duration.

Grid contains more rows, but they have been clipped.
