"Calls from ads" refers to a qualified conversion, meaning that the call had to go through and last for at least 60 seconds for it to be counted. "Calls Count" in the Call Reporting Details widget measures the total call volume generated by the ad.

Because a single ad can display multiple extensions at the same time, this data overlaps. As a result, the combined metrics (Impressions, Clicks, CTR, Cost, & Avg. CPC) for all extensions will appear much higher than the actual overall campaign totals.

This report shows many times an ad was clicked that contained that extension, not how many people clicked on that specific extension itself.

Click Type Performance

Device Performance

URL Click: When users click on the final URL in an ad.

Headline Click: Clicks on the ad's main headline, which also leads users to the main landing page.

Sitelink Click: When a user clicks on one of the sitelink extensions that links then directly to a specific page on your site.

Get Location Details Click: When a user clicks in to expand the client's location in the Maps section of the search results list.

Phone Calls Click: When a user clicks to call your business (includes hang ups after the click - will be less than the completed calls reported in the Conversion section).

Driving Directions Click: When a user clicks on the "Get Directions" link within an ad.

Location Expansion: Clicks on ads shown to users near or interested in locations similar to those targeted in the campaign.

Click Engagement by Age

Click Engagement by Gender

"Calls Count" is the number of times people clicked on a phone number displayed in an ad on a mobile device or manually dialed the Google forwarding number displayed in an ad on any device, regardless of the duration.

"Calls from ads" in the PPC Other Google Conversions widget measures qualified calls that last at least 60 seconds.
